

The most interesting vacation spots

Lainio Snow Village Ice Bar

(Ylläsjärvi)

Would you like to look forever young? You can preserve yourself by dining at 28 degrees Fahrenheit. The Ice Bar in one of Lapland's most interesting vacation spots is made completely from snow and ice. Even the tableware is nothing, but crystallized water. Visiting this place can be an exhilarating hobby, because it can only exist during wintertime and every year in late November is rebuilt from fresh snow to a completely new design. Just don't forget to dress warmly!
